Email: yzengao@connect.ust.hk Website: https://yushuzeng.github.io/ Office: Room 5568, Academic Building, HKUST, Hong Kong Phone: (86) 13856043565

Research Interests **Applications:** Operations-Marketing Interface; Platform Operations; Socially Responsible Operations; Economics of Information, Digitization, and Artificial Intelligence.

Methodologies: Applied Econometrics; Machine Learning; Large Language Models; Game Theory.

Education

Hong Kong University of Science and Technology 2019 – 2025 (Expected)

Ph.D. in Industrial Engineering and Decision Analytics

Advisors: Ying-Ju Chen, Xin Wang

University of Science and Technology of China

2015 - 2019

B.Sc. in Management Science

University of Washington, Foster School of Business

2018

Summer visiting student in Information System and Operation Management

Advisor: Yong Tan

Working Papers

Attribute and Quality Information Disclosure on Digital Content Platforms: Theory and Empirical Evidence

with Hu Huang, Ying-Ju Chen, Xin Wang. Submitted to *Manufacturing & Service Operations Management*. Job Market Paper.

Summary: This paper theoretically and empirically explores information disclosure strategies within the digital content platform. Our results indicate that firms with higher vertical quality are less likely to disclose attribute information to consumers, irrespective of the availability of quality information.

Text-Based Measurement and Analysis of Firm-Level Price Expectations from Earnings Call Transcripts

with Yunning Zhao, Ying-Ju Chen. Submitted to Management Science.

Summary: This paper utilizes the textual analysis method (BERT) to develop a paradigm for measuring firms' expectations and construct a novel firm-level indicator of firms' price expectations based on over 400,000 quarterly earnings conference-call transcripts.

Mergers and Product Repositioning: Theory and Empirical Evidence

with Soo-Haeng Cho, Zijun Shi, Xin Wang. To be submitted to *Manufacturing & Service Operations Management*..

Summary: This paper theoretically and empirically evaluates the merger effects of consumer welfare after product repositioning. A merger between two firms in the high-end markets is possible to improve consumer surplus, whereas a merger between two firms in the low-end markets always hurts consumers.

Teaching **Teaching Assistant for:**

Experience Optimizing Decisions for Personal and Business Development

Spring 2023 (Undergrad)

Industrial Engineering and Decision Analytics Fall 2020 - 2021 (Undergrad) **Engineering Management** Spring 2019 (Undergrad) Service Engineering and Management Spring 2020 - 2021, Fall 2022 (Undergrad)

Operation/Production Management Spring 2021 (MSc)

Global Supply Chain Management Fall 2022 (MSc)

Honors Postgraduate Studentship (HKUST) 2019-2024

> Outstanding Studentship (USTC) 2015-2018

Professional Referee: Manufacturing and Service Operations Management, Naval Research Lo-

Experience gistics.

Conference Session Chair: POMS-HK 2023

Joint University Programmes Admissions System interviewer: 2020-2023

Department Seminar Coordinator: Fall 2023

Talks **INFORMS Annual Conference** Oct. 2023, Oct. 2024

> POMS-HK Conference Jan. 2023, Jan. 2024 **POMS Annual Conference** Apr. 2024 POMS China Conference Jun. 2024

Skills Python, R, SQL, Stata, Matlab, Mathematica
